I urge you to reject NAB's petition 04-160. Since subscribing to XM radio a year and a half ago I have greatly benefited from XM's variety of programming. I am able to listen to the programs that I like, and the variety is overwhelming. The broadcast radio market in the Detroit stinks. How many Sports talk stations does one market need anyway? That was one of the main reasons that I subscribed to XM. The instant traffic and weather also are extremely helpful. I do not see why the broadcast media thinks that they should have a monopoly on this information.
